Office Action Commence	10/579,639	VASILYEVA ET AL.				
Office Action Summary	Examiner	Art Unit				
	GARY W. COUNTS	1641				
The MAILING DATE of this communication app Period for Reply	ears on the cover sheet with the c	orrespondence address				
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION. - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication. - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication. - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status						
1) Responsive to communication(s) filed on 18 M	av 2006

DETAILED ACTION

Election/Restrictions

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, claim(s) 1, 3-8, 11-14 and 16-30, drawn to a method for detecting the presence of an IgG4 polypeptide.

Group II, claim(s) 2, 9, 10 and 15, drawn to a method of detecting the presence of a polypeptide.

Group III, claim(s) 31-34, drawn to a method of inhibiting disulfide bond rearrangement.

Group IV, claim(s) 35-42, drawn to composition.

The inventions listed as Groups I-IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons:

The technical feature linking Groups I-IV appears to be the composition comprising a polypeptide and a sulfhydryl alkylaing agent.

However, Li (US 3,853,833) discloses a composition comprising peptide and iodoacetamide (sulfhydryl alkylating agent, same as currently recited) (col 9, lines 38-63 and col 12, line 64 – col 13, line 3).

Application/Control Number: 10/579,639 Page 3

Art Unit: 1641

Therefore, the technical feature linking the inventions of Groups I-IV do not constitute a special technical feature as defined by PCT Rule 13.2, as it does not define a contribution over the prior art.

Also, the inventions listed as Groups I-III do not relate to a single general inventive concept under PCT Rule 13.1 because; under PCT Rule 13.2 they lack the same or corresponding special technical features for the following reasons. Claim 1 of Group I is directed to a method of detecting the presence of IgG4 polypeptide whereas Claim 2 of Group 2 is directed to detecting the presence of a polypeptide and Claim 31 is a method of inhibiting disulfide bond rearrangement. Also, Group II requires a mixture of polypeptide multimers having two or more polypeptide chains and comprising at least one disulfide linkage between the polypeptide chains and Group I & III do not require these limitations. Further, Group II requires loading a mixture onto a chip and Group I & III do not require these limitations. Groups I-III have different method steps with different purposes and different outcomes. Therefore, there are three different methods.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim

remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

3. The examiner has required restriction between product and process claims. Where applicant elects claims directed to the product, and the product claims are subsequently found allowable, withdrawn process claims that depend from or otherwise require all the limitations of the allowable product claim will be considered for rejoinder.

All claims directed to a nonelected process invention must require all the limitations of an allowable product claim for that process invention to be rejoined.

In the event of rejoinder, the requirement for restriction between the product claims and the rejoined process claims will be withdrawn, and the rejoined process claims will be fully examined for patentability in accordance with 37 CFR 1.104. Thus, to be allowable, the rejoined claims must meet all criteria for patentability including the requirements of 35 U.S.C. 101, 102, 103 and 112. Until all claims to the elected product are found allowable, an otherwise proper restriction requirement between product claims and process claims may be maintained. Withdrawn process claims that are not commensurate in scope with an allowable product claim will not be rejoined. See MPEP § 821.04(b). Additionally, in order to retain the right to rejoinder in accordance with the above policy, applicant is advised that the process claims should be amended during prosecution to require the limitations of the product claims. Failure to do so may result in a loss of the right to rejoinder. Further, note that the prohibition against double patenting rejections of 35 U.S.C. 121 does not apply where the restriction requirement is withdrawn by the examiner before the patent issues. See MPEP § 804.01.
